89%

of companies consider introducing hybrid work policies or have already introduced them in their work environment.

Source: KPMG Current trends in remote working

Is your company ready to provide agile, flexible and secure collaboration experiences for employees?

Undoubtedly, the office remains the best place for interaction, as the need to socialize and share knowledge and ideas in a face-to-face environment always remains. **But why limit access to meetings only in the office?**

Work styles have transformed to more **flexible, immediate, and secure** ways of collaboration, no matter where we are, and thanks to this, decision makers have seen an increase in the productivity of their employees with access to communication and collaboration wherever they are.

However, companies continue to face some challenges regarding the new work styles that are here to stay.

SOA Sistemas Operativos Argentinos
RICOH imagine. change.

Here are some of the current challenges by department:

Functional areas:

- Up-to-date and easy-to-use tools.
- Easily change or adjust collaboration structures.
- Connect in-office teams with remote collaborators efficiently.
- Increase employee productivity in a hybrid way.

IT areas:

- User-friendly tools and technical support.
- Standardization of technological solutions in all its facilities.
- Integrate cloud-based solutions, and not only local.
- Comply with information security regulations.
- Cost-competitive and high quality solutions.
- Support in the design, installation, dissemination, training, and maintenance of the solution.

Áreas de Facilities:

- Promote employee productivity with more interactive environments for a better experience.
- Ensure smooth interaction.
- More efficient response times from your suppliers.
- Have suppliers that offer complete services.

If you identify with any of the above challenges, your company requires a more flexible and dynamic digital collaboration ecosystem that connects people, supports communication, and provides better interaction experiences between employees, partners and customers, no matter where they are located.

The time to connect and collaborate wherever you are in a **safe, agile and dynamic** way is **NOW!**

With **Ricoh Connected Workplace** you can adapt your company to the new hybrid work style from consulting and design of spaces to the implementation and configuration of collaboration and videoconferencing rooms that provide better interaction experiences for both your employees and your customers.

8 people or more

Ricoh Medium Room
16 people or more

Ricoh Auditorium
40 people or more

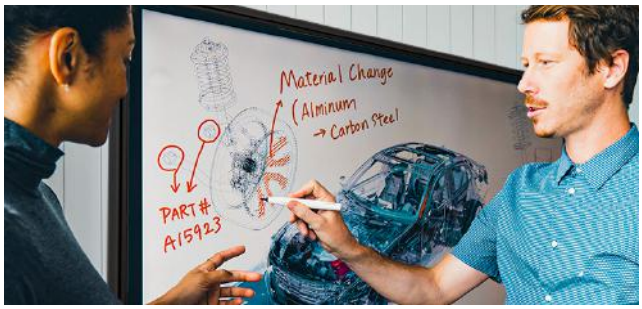

The results of work sessions are more satisfying when the time is spent meeting and collaborating, not trying to make the technology work.

Therefore, **Ricoh Connected Workplace** includes **Ricoh Creative Collaboration**, creative collaboration software packages for interactive whiteboard displays (IWBs), also called interactive flat panel displays (IFPDs), and personal mobile devices such as PCs, tablets and smartphones that simplify connectivity, connecting people and optimizing collaboration for focused productivity, bringing you:

- One-touch start of video conferencing.
- No application needed for wireless connection.
- Brainstorm and collaborate in meetings that you can store on the whiteboard.

RICOH Spaces

RICOH Spaces is a single, enterprise-grade platform to manage every touchpoint of the in-office work experience. Designed to simplify the hybrid-first work experience, RICOH Spaces takes the hassle out of coming into the office. From booking a desk or meeting room to reserving a parking spot, you can support in-person experiences with ease and flexibility from digital, self-serve tools.
